

PP Filter Housing 334

Micropore PP Filter Housing 226 type is made of PP, PVC materials which have good chemical compatibility. Simple configuration design makes the installation and operation easier. The housing is designed to fit 10" 334 single open end cartridge. The material used is safe and low precipitation. It can be used in the filtration of water and general chemicals in kinds of industry.

FEATURES

- Safety materials, low precipitation
- Accepts 10" 334 O-rings style cartridge
- Wide chemical compatibility

APPLICATIONS

- * Pharmaceuticals
- * Food and beverage
- * Chemical
- * Microelectronics
- * Cosmetics
- * Ink
- * Water treatment

PRODUCT SPECIFICATION

Material of Constructions	[Head]: PP [Bowl]: PP [Clamp ring]: PP [Connector]: PVC [Nut]: PVC [Sealing]: EPDM , Viton®
Dimension	[Inlet / Outlet]: 40A (48.4mm)、50A (60.4mm) [Vent]: 3/8" PTF [Drain]: 3/8" PT
Performance	[Max. Operating temperature]: 60°C [Max. Operating DP]: 6bar@21°C
