Microfil™ Syringe Filter

Microfil™ Syringe Filter are high quality with qualified raw membranes, Well packaged, and offered a competitive price. The classic range is available in all of the major membranes including Nylon, PTFE, PES, MCE, CA and PVDF, which are Supplied in 4mm, 13mm, 25mm, 33mm formats in virgin Medical polypropylene housing.

Features

- Application Compatibility: Broad range of filtration media meets diverse application needs
- Minimum Sample Hold-up: Syringe Filters' housings are specifically designed to maximize Sample recovery
- Convenient: Each unit is clearly marked with an identifying code to denote pore size, membrane material
- Sterile: Filters can be purchased pre-sterilized by Gamma radiation and individually packaged

Application

- HPLC sample preparation
- Routine QC analysis
- Content uniformity
- Removal of protein precipitates
- Dissolution testing
- Food analysis
- Biofuel analysis
- Environmental samples

Microfil™ 4mm Syringe Filter

Microfil™ 4mm Syringe filters are manufactured to built with features designed to bring the high level performance and purity to research. It is suitable for the sample volume less than 1 mL. We incorporate a variety of membranes including Nylon, Hydrophobic PTFE, Hydrophilic PTFE, PES....to offer separation and purification solutions for the majority laboratory filtration applications

Application

- HPLC samples containing low solid content – filtration will improve column life
- CE (Capillary Electrophoresis) samples – filtration will eliminate spurious peaks
- Sterile filtration of low volume samples
- UV/Vis samples – filter directly into cuvette using tube tip
- Refractometry filter samples to prevent damage to instrument optics and improve accuracy
- Minimizing non-specific binding to membrane due to small membrane size

Features

- 4 mm diameter syringe filter
- Sample volume up to 1 mL
- Low hold-up volume < 10 µL ensures maximum sample recovery

Micropore™ Sterile Syringe Filter

Micropore™ sterile syringe filters is designed for Bio-media Filtration. Each filter is individually packed and sterilized by Gamma Radiation. Every Syringe Filter is printed with expiry date for easy QC tracking. 33mm,30mm,25mm,13mm diameter available.

- PES (Polyethersulfone)
- Hydrophilic PVDF
- PTFE (Polyfluortetraethylene)
- MCE (Mixed Cellulose Ester)
- NY (Nylon)
- CA (Cellulose Acetate)

Micropore™ PES Sterile Syringe Filter

Features

- High filtration speed
- Low exeractables
- Lowest protein binding
- Designed with a Female Luer-Lock inlet and Male Luer-Slip outlets
- Some Filters are individually wrapped sterile, certified RNase-free, DNase-free and DNA free with Non-pyrogenic

Application

- Sterile filtering protein solution
- Tissue culture media filtration
- Tissue culture additive filtration

Micropore™ Sterile MCE Syringe Filter

Features

- Uniform aperture ,No medium dropping
- Thin texture ,Little resistance
- High filtration speed ,Little absorption
- All items are quality tests for filter efficacy and housing integrity. The housing is pressure tested for use with up 75 psig (5.0 bar) of pressure
- Designed with a Female Luer-Lok inlet and Male Luer slip outlets.
- Some Filters are individually wrapped sterile, certified Rnase-free, Dnase- free, Non-pyrogenic,

Application

- Gas particulate and bacteria filtration and then inspect them
- Oil particulate and bacteria filtration and then inspect them
- Alcohol particulate and bacteria filtration and then inspect them
- Other solvent particulate and bacteria filtration and then inspect them

Micropore™ Sample Vials

Micropore™ sample vials provide advantages over the standard straight glass sample vials. The flared end of the vial makes loading a liquid sample much easier since the flare helps guide the syringe needle into the vial. The flared end also makes the vial much stronger so that vials can easily be inserted and removed from the end of the probe using tweezers without breaking the glass.

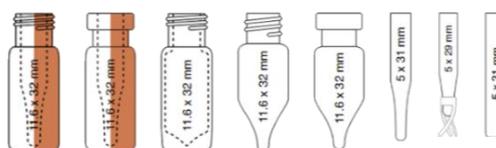

Features

- ◆ Tightest dimensional tolerances in industry
- ◆ MF scan on certificate in every pack
- ◆ Raw Material: Glass tubing, Borosilicate, Type 1, Class A from Schott.
- ◆ Computerized camera system for quality control throughout the manufacturing process to test critical dimensions, including Height, Diameter, Bottom Thickness and Neck/Thread.
- ◆ Only vial/cap/septum combination tested by LCMS for cleanliness
- ◆ Cap/Septum - tested by head space GC to ensure proper curing of silicone polymer

Micropore® Bonded Cap

Micropore® Bonded caps is designed with septa and polypropylene caps bonded by proprietary bonding technology. Each batch tested and verified by an independent laboratory for the high quality standards. Currently, 12x32mm 9mm screw top vials screw caps and

Features

- Bonding process eliminates possibility of septa loose and being pushed into the vial
- Pre-slit PTFE/Silicone septa reduce the possibility of coring
- Easy to pierce,durable for multiple penetration,Reduced handling and resulting contamination
- Low extracts,Broad chemical resistant,no interfering peaks,Temperature range of -40 °C to 200 °C

Micropore® 9-425 Screw Top Vials with Fused Insert

Specifications:

- Glass Type: Type-1, 33 Expansion Borosilicate
- Dimensions: 12*32mm, Wide opening
- Insert Vial Volume: 300µL
- Screw Top: 9-425 Screw Top

Features

- Precision-formed glass base offers better stability and more concentrated heat source for dry downs.
- These fused insert vials are manufactured so that the needle will never seal against the insert.
- More stable than conical vials, fused insert vial can be used with other Autosample vials in the sample run.
- These vials are used with many Agilent, CTC PAL, Perkin-Elmer, Shimadzu, and Thermo autosamplers. An excellent choice for budget minded laboratories.

Micropore™ Lab Pure Water Filter Capsule

Micropore™ lab pure water filter capsule is qualified with high quality asymmetric PES membranes, well packaged. It is ready to use for for Ultrapure & EDI Lab Water Systems as filter for contaminant, Bacteria and particle removal. The inlet connections is 1/4" NPTM easy to install.

Features

- Application Compatibility: Suitable for various brand lab water purification systems
- Adapter: 1/4" NPTM inlet easy to install and 3/8" bared hose with shield outlet for prevent pollution.
- Using times: Disposable filter design reduce cleaning time and maintenance cost.
- Manufactured in a controlled environment according to ISO9001 certified Quality Management System
- Integrity: 100% integrity tested including bubble point and diffusional flow rate.

Specification

Materials of Construction
Filter Media: Asymmetric PES
Support & Housing: Polypropylene (PP)
Sealing Technology: Thermal Welding (No Adhesives)
Effective Filtration Area: ≥ 150 cm ²
Pore Size: 0.22μm/0.45μm
Inlet/Outlet:: 1/4" NPTM 3/8" Bared Hose With Shield
Pressure-resistant: 25°C, 3.0bar。
Diffusional flow rate: ≤35ml/min@2.76bar

Micropore® Vent Filter

Micropore® vent filters is also called vacuum protection filter or gas line filter, They are designed for the removal of particles and micro-organisms for venting and gases. Which are ideal for sterilizing gases, venting sterile containers, sterilizing or clarifying organic solutions and protect laboratory. The special construction allows minimal hold-up volume and particle shedding, making it ideally suited for the critical needs of the pharmaceutical and biotechnology industries.

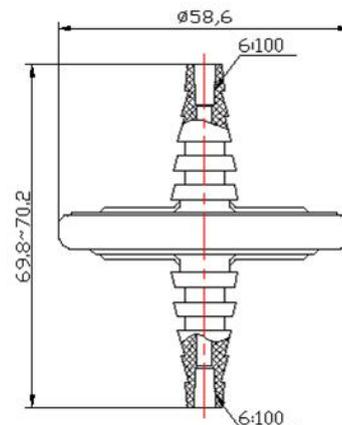

Application

- Sterile venting of small fermenters
- Sterile venting of small containers
- General sterile filtration of gases and air

Features

- Autoclave, ideal for use with bioreactors and fermenters.
- Have broad chemical resistance
- Large surface area provides greater throughput and permits higher air flow rates

Technical Parameter

Micropore® TC Vent Capsule Filter

Micropore® TC vent capsule filter is qualified with high quality raw membranes, well packaged. It is ready to use for contaminant, Bacteria and particle removal in Bio-Pharmaceutical , Food&Beverage industry as vent filter for sterile container, gas purifying, gas sterile filtration etc. The classic range is available with major membrane of Hydrophobic PTFE PVDF,PES with virgin medical polypropylene housing.

Features

- Application Compatibility: Broad range of filtration media meets diverse application needs.
- Minimum Hold-up Volume: housings are specifically designed to low hold-up.
- Convenient: Tri-clamp (TC) type inlet/outlet connections easy to install.
- Using times: Disposable filter design reduce cleaning time and maintenance cost.
- Manufactured in a controlled environment

Microfil™ Disc Membrane Filter

Microfil™ disc membrane filter are micro-porous films with specific pore size ratings. Membranes retains particles and microorganisms that exceed their pore rating as a physical barrier and capturing such particles on the surface of the membrane, Micropore supplies kind of membrane filter Nylon PES Hydrophobic PTFE, Hydrophilic PVDF, MCE PP and sterilized MCE Gridded membrane for Microbiology Test application.

Nylon Membrane Filter

- Hydrophilic
- High protein binding capacity
- Ideal for Bacterial and Particulate removal
- Compatible with aqueous and alcoholic solutions and solvents; suitable for HPLC

Sterile MCE Gridded Membrane

Micropure™ Sterile MCE Gridded Membrane are widely used in Kinds of microorganisms examination. They are sterile-sealed, without protective paper on top of each filter, and in a individual package on a band. The special pleating of the band units ensures that they are perfectly flat when dispensed. With clear advantages including operating convenience, less risk of accidental membrane contamination, less care and skill to aseptically separate membrane from packaging to reduce time per test.

Features

- Excellent retention and colony growth, high recovery rates of microorganisms
- Individually wrapped in easy-peel band pack, gamma irradiation
Calibrated Mixed Cellulose Esters filters, which designed to maximize flow rates
- The filter type, diameter, lot number, sterilization and expiration date are printed on the package of each membrane filter unit for complete traceability

Specifications

Filter Media: Mixed Cellulose Esters

Color: White or black with Gridded

Wettability: Hydrophilic

Max. Operating Temperature (Water): 74 °C

Extractables (Boiling Water): < 2%

Sterilization: Sterilized by gamma irradiation

Application

- General purpose of all microorganisms examination in medical, wine, beverage and pharmaceutical industry
- Designed for use in vacuum and pressure filtration applications
Individually packed, sterile ideal for microbiology analysis and sterility testing
- E. Coli bacteria recovery and detection in water/waste water analysis
- Analysis of yeast and mold and Legionella sp. examination of White, beige colonies

Microfil™ Filter Paper

Micropore offers wide size ranges and grades of special paper products including; Filter Paper, Quartz Fiber Filter, Glass Fiber Filter They are manufactured from the highest quality materials under strict quality control guidelines.

- 1: Quantitative Ashless Filter Paper
- 2: Qualitative Ashless Filter Paper
- 3: Glass Fiber Filter
- 4: Quartz Fiber Filter

Quantitative Ashless Filter Paper

- Made of Highest quality alpha cotton cellulose "Ashless" (Ash content 0.01%)
- High resistance to moisture
- Acid washed and rinsed with ultrapure water to neutralize
- Four kinds of flow rates are available: Fast, Medium, Slow
- Round format and square format are available
- Special sizes available upon request

PM1, PM2.5 Monitoring Membrane Filters

Micropure PM1, PM2.5 monitoring membrane are manufactured according to US EPA 40 CFR Part 50, Appendix L. The thin, high purity and high retentive PTFE film are sequentially numbered and supported with an inert PMP or PP support ring. Additionally, extremely low extractables and fluorescence background benefit in trace element analyses, e.g. ICP-MS & ED-XRF.

Features

- Conform to EPA 40 CFR Part 50, Appendix L.
- Sequentially numbered on each membrane
- Supporting design eliminates curling, easy for manual and automation operation
- High retention, extremely low metal background
- Excellent chemical and thermal stability
- Manufactured under ISO9001 quality system and 100,000 Class clean room
